# Apollo Hospitals performs innovative therapy

Chennai, May 31: Apollo Hospitals Chennai has achieved a remarkable world-first by successfully performing the Simplicity Spyrul renal denervation (RDN) therapy on a patient with an ectopic kidney. Dr. RefaiShowkathali and his team carried out this pioneering procedure to treat resistant hypertension in a 58-year-old man with uncontrolled blood pressure despite being on a maximum medical regimen.

Hypertension, or high blood pressure, is a prevalent condition affecting nearly one-third of individuals over 40 years old. Controlling blood pressure is crucial, as even a modest 5mmHg reduction can decrease the risk of stroke by 34%, ischemic heart disease by 21%, and mortality by 13%. The 58-year-old patient had an ectopic left kidney located in the right iliac fossa, supplied by two separate renal arteries – an extremely rare anatomical variation. The innovative RDN therapy involved radiofrequency ablation of both renal arteries, leading to a remarkable reduction in the patient's blood pressure from over 160/100 mmHg to 130/80 mmHg within a day. He was discharged the next day, requiring only two medications instead of the previous five.

Dr. RefaiShowkathali, Senior Consultant, Interventional Cardiology, Apollo Hospitals Chennai, said, "We are happy to have successfully performed the world's first Simplicity Spyrul RDN therapy on a patient with an ectopic kidney. This procedure offers new hope for patients with complex resistant hypertension conditions. The patient's

significant improvement demonstrates the therapy's potential in managing obstinate cases of high blood pressure."
